Keys to Success: Pro Tips for Learning on Coursera

Defining Data Science

What Do Data Scientists Do?

- ✓ **Video:** A day in the Life of a Data Scientist
3 min
- ✓ **Video:** Data Science Topics and Algorithms
3 min
- ✓ **Video:** What is the cloud?
3 min
- ✓ **Reading:** What Makes Someone a Data Scientist?
20 min
- ✓ **Quiz:** What Makes Someone a Data Scientist?
5 questions

Exercise: Use computer vision to identify objects with IBM Watson

- ✓ **Reading:** Exercise: Identifying objects in images with IBM Watson
5 min
- ✓ **Reading:** Exercise: Upload and classify your images!
30 min

About this exercise:

In this lesson, we'd like to take you on a bit of a side journey. It's a fun exercise and I hope you enjoy it as much as we enjoyed putting this short exercise together for you. This exercise is ungraded, so feel free to have fun with it!

Image Classification with IBM Watson Visual Recognition:

What better way to understand the applications of data science than to try it out yourself? You'll be uploading images and seeing how IBM Watson identifies the various objects and faces (even gender and age!) in your images.

donald_trump.jpg

Face 1	
Age: 59 to 62	0.80
Male	0.99

barack_obama.jpg

Face 1	
Age: 43 to 47	0.70
Male	1.00

To learn how to classify your own images, continue on to the next reading!
